October 27, 2000

Dear Hydro Mobile,

As you requested I am more than happy to express my views on your Factory Training Seminar I attended in April, and also my thoughts and opinions on the Hydro Mobile Scaffolding System in general.

I could not begin to tell you how pleased we are at Gates Construction Co., Inc. with the Hydro Mobile Units we have purchased. Our labor savings alone are unbelievable not to mention the added production we are given by our masons. Not only is it to our advantage to use your product as far a production is concerned, but it serves us well in the General Contractors eyes. At times they are amazed at the speed in which a building is completed, and from a safety aspect who could ask for more. Most OSHA Compliance Offices just smile and walk away.

But having the Hydro Mobile and knowing how to use it are two entirely different things. I commend Hydro Mobile and their whole staff for providing the best three days of training imaginable to Mason Contractors and Suppliers alike. Not only do you run a first class facility, but also the professionalism I witnessed from the employees in the Manufacturing Facility, to the instructors, to the Engineering Department was unmatched, and like no other seminar I have ever attended. Gabe does a wonderful job at holding the interest of the attendees and I certainly appreciated the opportunity to be there. Our suggestions for improvements to the product were very welcomed and with the never ending innovations and such improvements I look forward to using Hydro Mobile for many years to come.

Sincerely,

Davis Mitchell
