MOTORIZED UNITS and ACCESSORIES DAILY INSPECTION CHECKLIST			YD	RO	мс) 1811.6
PROJECT: QUALIFIED USER/OPERATOR(full name):						
LOCATION: MOTORIZED UNIT SERIAL NUMBER:						
CONTRACTOR: DATE (WEEK OF):						
Each Hydro Mobile motorized unit and its accessories must be inspected daily or before every working shift, as well as weekly. These inspections must be carried out by a qualified user / operator. Use the spaces below to monitor 6 days of the daily and weekly inspections. Use the Notes and Comments section to indicate any discrepancy or any item found to be not acceptable. Any discrepancy must be reported and appropriate corrective action must be taken immediately. Corrective actions must be performed by a qualified technician. "Qualified" means a person who, by possession of a recognized degree, certificate or professional standing, or who by extensive knowledge, training and experience, has successfully demonstrated the ability to solve or resolve problems relating to the subject matter, the work or the project. Only a qualified user/operator on the specific make and model of the Hydro Mobile equipment is allowed to perform repairs on Hydro Mobile units. These inspections and repairs must be performed according to the audified user/operator on the specific make and model of the Hydro Mobile training courses. Daily and weekly inspections must be performed by a qualified user/operator (see above).						st be ized matter,
USE CHECK MARK FOR EACH ENTRY VERIFIED. IF NECESSARY, TAKE CORRECTIVE ACTION BEFORE INSERTING CHECK MARK.	1	2	3	4	5	WEEK
ACCESS and SAFETY SERIAL NUMBER (if applicable):						
1 A legible copy of the Owner's manual is present in the toolbox.						
2 Access stairs, ramps and door are clear of any obstruction and in good condition.						
3 All access panels are clear of material and equipment.						
4 All safety guardrails are in position and gates are operational and lock properly (no fall hazard).						
5 An evacuation plan specific to the job site is available to all workers.	-					
6 If motorized unit is used with accessories, the daily inspection of each accessory present on the setup has been performed.						
7 If the work platform is accessed from inside the building or off a scaffold stair tower, transfer is safe and free from obstruction.	_					
8 Minimum clearance from overhead power lines is maintained according to local regulation.					_	
 9 On special façade shapes, cross box kits, face guardrails and plank guardrails are properly installed and secure. 						
10 Operator is qualified and has a valid training certification.						
11 Perimeter of setup is safe and delimited (warning tape, concrete blocks). Proper barriers have been installed and are in place.						
12 Setup and installation meet the requirements prescribed by owner's manual or approved engineering drawing.						
13 The platform clears all obstacles (building, balconies, etc.) and can be raised or lowered.	13 The platform clears all obstacles (building, balconies, etc.) and can be raised or lowered.					
14 Weather and wind speeds forecasts have been validated and are within the parameters specified by the Owner's manual for the configuration used. Monitoring of weather and wind speeds must be performed throughout the work shift to ensure they remain within the specified parameters. Image: Configuration used 15 Work and circulation areas on the platform are clear of any obstruction and kept clean with good housekeeping. Image: Configuration used Image: Configuration used						
BASE SERIAL NUMBER (if applicable):						L
BASE SERIAL NUMBER (if applicable): 16 Base is level and cribbing under jacks has not moved.						
17 Bearing surface has been inspected. Bearing surface is stable and has not been subject to any type of erosion or deterioration caused by weather conditions (snow, rain, etc.).						
MOTORIZED UNIT – COMPONENTS SERIAL NUMBER (if applicable):						
18 Control joystick has been verified and is functioning properly.						
19 Each cylinder hook, secondary hook and lowering cam is in good condition, funtions properly and engages correctly on the mast rung.						
20 Each cylinder, hydraulic hose and hydraulic component is free of leaks and signs of wear.						
21 Each roller has been greased using Prolab GS1000 #28840 only. (WEEKLY)						
22 Each roller has been verified and is in good condition.						
23 Emergency stop has been verified and is working properly. IGNITION MUST BE TURNED OFF when the unit is not in operation.						
24 Gasoline and engine oil levels are appropriate or have been replenished.						
25 Hydraulic oil level has been verified and hydraulic tank has been replenished, if required, with oil recommended by Hydro Mobile.						
26 Lifting mechanism is clear of debris (mortar, masonry material, etc.) and shows no signs of excessive wear.						
27 Motorized unit structure has been inspected and shows no signs of damage or distortion.	7 Motorized unit structure has been inspected and shows no signs of damage or distortion.					
28 Rubber on each cylinder hook has been verified as described in Owner's manual procedure and is in good condition.
