Reference: Hydro Mobile M2 Equipment & Service feedback

Dear Gabriel,

I want to thank you for your recent visit with Eric Yates and Blake Thomas from Lynn Ladder & Scaffolding, our local Hydro Mobile dealer. As discussed, dollar for dollar Hydro Mobile platform scaffolding is the best equipment investment we have made over the past 15 years. We now own a fleet of 14 units and are presently renting an additional 8 units. Now that Hydro Mobile and Lynn Ladder have teamed up, I think we are getting the best product and service combination that we could have imagined.

Not only does this product enable us to be more productive; day in and day out its basic concept and design provides more inherent safety and ergonomics for our men. The sight of this product on our job is enough to convince any safety professional that we consider safety a priority on our jobs. In addition, it also conveys a commitment of Old North State Masonry, LLC to be the "best in class" to our clients.

A few years ago, our company investigated products that were essentially "knock-offs" of the Hydro Mobile M1, the first hydraulic mast climber to be introduced in North America. We are happy we decided to stay with Hydro Mobile as those manufactures are no longer around. We are very proud of the fact that we have purchased your product on three separate occasions and have been completely satisfied each time.

Other elements that are important to us are the market value of our equipment and how we can add to and complement our existing fleet. Hydro Mobile has been diligent in the development of it's newer versions to ensure compatibility with previous models. Even to the extent in certain cases you provided upgrade kits so that our equipment investment dollars stretched further. As a matter of fact, I can remember Eric Yates adding pockets to upgrade our M1 bridging (up in the air) to make them easier to mix and match. These bridges are at least 12 years old and are still in use!

Finally, training our men in order for them to maintain higher safety and productivity habits is a priority for Old North State Masonry, LLC. With Hydro Mobile University supporting Lynn Ladder, training programs are tailored to suit our needs and help us build faster and safer.

I recommend that anyone looking at renting or owning Mast Climbing Work Platforms go for the best value. That's what Hydro Mobile and Lynn Ladder are all about.

Best regards,

Joe Anastasi
President
