AC	CCESS and SAFETY	SERIAL NUMBER (if applicable):						
1	1 A legible copy of the Owner's manual is present in the toolbox.							
2	2 Access stairs, ramps and door are clear of any obstruction and in good condition.							
3	3 All access panels are clear of material and equipment.							
4	4 All safety guardrails are in position and gates are operational and lock properly (no fall hazard).							
5	5 An evacuation plan specific to the job site is available to all workers.							
6	6 If motorized unit is used with accessories, the daily inspection of each accessory present on the setup has	been performed.						
7	7 If the work platform is accessed from inside the building or off a scaffold stair tower, transfer is safe and fr	ree from obstruction.						
8	8 Minimum clearance from overhead power lines is maintained according to local regulation.							
9	9 On special façade shapes, cross box kits, face guardrails and plank guardrails are properly installed and sec	cure.						
10	Operator is qualified and has a valid training certification.							
11	Perimeter of setup is safe and delimited (warning tape, concrete blocks). Proper barriers have been install	ed and are in place.						
12	Setup and installation meet the requirements prescribed by owner's manual or approved engineering draw	wing.						
13	The platform clears all obstacles (building, balconies, etc.) and can be raised or lowered.							
14	14 Weather and wind speeds forecasts have been validated and are within the parameters specified by the O Monitoring of weather and wind speeds must be performed throughout the work shift to ensure they rem	· · · · · · · · · · · · · · · · · · ·						
15	Work and circulation areas on the platform are clear of any obstruction and kept clean with good houseke	eeping.						
BA:	ASE	SERIAL NUMBER (if applicable):						
16	Base is level and cribbing under jacks has not moved.							
17	1.7 Bearing surface has been inspected. Bearing surface is stable and has not been subject to any type of eros conditions (snow, rain, etc.).	ion or deterioration caused by weather						
MC	OTORIZED UNIT – COMPONENTS	SERIAL NUMBER (if applicable):						
18	18 Control joystick has been verified and is functioning properly.	_						
19	19 Each cylinder hook, secondary hook and lowering cam is in good condition, funtions properly and engages	correctly on the mast rung.						
20	20 Each cylinder, hydraulic hose and hydraulic component is free of leaks and signs of wear.							
21	21 Each roller has been greased using Prolab GS1000 #28840 only. (WEEKLY)							
22	22 Each roller has been verified and is in good condition.							
23	23 Emergency stop has been verified and is working properly. IGNITION MUST BE TURNED OFF when the unit	t is not in operation.						
24	24 Gasoline and engine oil levels are appropriate or have been replenished.							
25	25 Hydraulic oil level has been verified and hydraulic tank has been replenished, if required, with oil recomme	ended by Hydro Mobile.						
26	Lifting mechanism is clear of debris (mortar, masonry material, etc.) and shows no signs of excessive wear	:
