L'Assomption, Quebec
Canada J5W 2T9

Ladies, Gentlemen:

It is with pleasure that I am asked to share my experience in training with the Hydro Mobile scaffolding.

The course was taught at the manufacturing facility and home office in L'Assomption, Quebec with presentation in both the classroom and "hands on" field experience with the scaffold system. The program was well presented and very comprehensive thanks to the sincerity and professionalism of the instructor Gabriel Daigle.

I feel that the training should be considered mandatory for both owners and field personnel that wish to realize the full potential of their scaffolding system. After attending the program you realize that the integrity, sincerity and superior support is not just at the sales level, but throughout the Hydro Mobile Team thanks to the outstanding enthusiasm and knowledge shared by Gabriel Daigle and his training program.

In closing, Hydro Mobile Scaffolding provides our industry the vehicle to insure a faster, safer and superior method of construction which is backed with factory support that is never compromised.

Sincerely:

Pem J. Eberlein
President
